

Professional Experience

24x7Systems (<https://www.24x7systems.com>)

Platform Engineer / Lead | 2024–Pres

- Runtime team member: Managed K8s cluster patching via rafay blueprints and helmfiles.
- Operations Leadership: Managed K8s cluster stability and emergency response for high-stakes outages.
- Python tooling: Built Pydantic type safe tooling for running a suite of validation tools such as conftest, kubeconform and istioctl.
- AI Augmentation: Integrated Vertex AI and Gemini for automated root-cause analysis for complex K8s networking and Terraform state drift.
- Terraform: Performed changes in Terraform primarily for resources in AWS architecture, k8s and associated application needs.
- Automated Documentation: Leveraged Python Sphinx and Jinja templating to enhance specific pages requiring advanced features.
- Security Automation: Developed custom Anchore/Harness integrations to automate vulnerability scanning.
- Artifact Governance: Managed JFrog Artifactory lifecycles for UBI images.
- GitOps: Built many CI/CD pipelines via GitLab and Harness.

CACI International (<https://www.caci.com>)

DevOps Engineer | 2023–2024

- GitOps Orchestration: Led infrastructure engineering for GitLab and Vault; managed automated Kubernetes delivery via ArgoCD.
- State Enforcement: Ensured 100% state-sync across cloud environments using ArgoCD and GitOps best practices.
- Custom Tooling: Built Python and Bash automation for platform API integrations and dynamic resource scaling.
